

The solution for heavily soiled pools.

The proliner tube.

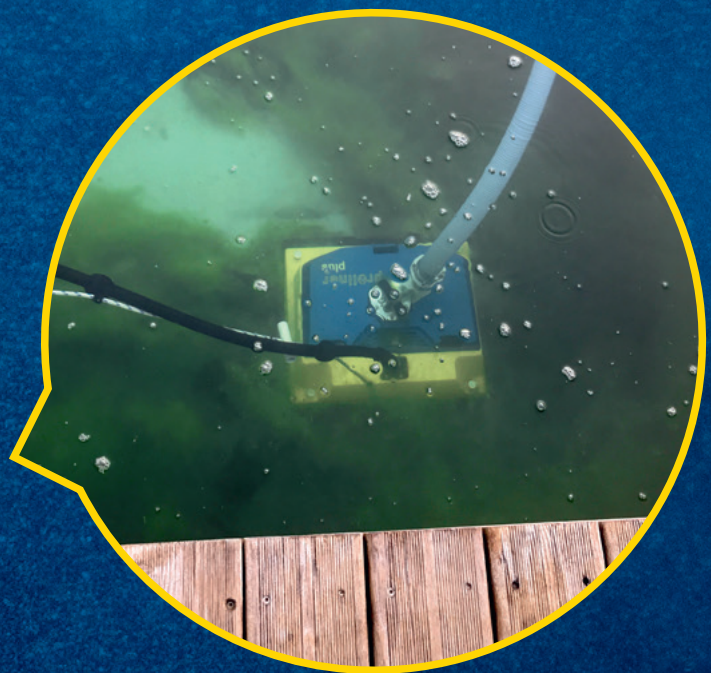

mariner 

The proliner tube.

Extreme tube power against stubborn dirt.

Heavily soiled pools
are no longer the
final straw – thanks
to the proliner tube.

With its extreme pumping power, it also reliably removes stubborn dirt: With a second hose, the dirty water is either pumped into an external filter or directly into the waste water. The cleaning can be done automatically or manually.

Transport trolley with cable drum and pool cleaner proliner tube

Weight/dimensions

Transport trolley with cable	45 kg
Base device	37 kg
Total net weight	82 kg
Dimensions of robot on trolley (L x W x H)	90 x 80 x 115 cm
Dimensions of robot (L x W x H)	55 x 60 x 50 cm

Electrical connection

Supply voltage	230 V AC (-)
Frequency	50 Hz
Current consumption	8 A
Power cable length	10/20 m

Control

Manual operation	Wireless, radio remote control
Emergency operation	Control panel keypad
Radio frequency	868/433 MHz

Device data

Operating voltage	230 V AC (-)
Current	8 A
Protection type	IP68
Device width	600 mm
Cleaning width	up to 700 mm
Pump capacity	200-400 l/min*
Floating cable length	30/40 m
Drive speeds	7.5-18 m/min
Hose connection	1½", Storz K66

Environment properties

Minimum water depth	20-30 cm
Water temperature	10-40 °C
Maximum water depth	7 m

* depending on hose length, hose diameter and delivery height
